FOREWORD

The data collection programs of the Department of Water Resources have been designed to supplement the activities of other agencies to satisfy specific needs of the State. Bulletin No. 130-75 presents useful, comprehensive, accurate, and timely hydrologic data which are prerequisites for monitoring environmental conditions as well as effective planning, design, construction, and operation of water facilities.

The Bulletin No. 130 series has been published annually in five volumes since 1963. Each volume presents hydrologic data for one of five reporting areas of the State. These areas are delineated on the map to the left.

This Bulletin No. 130-75 is the last of this series to be published. It is to be replaced with a statewide hydrologic data index, which will show what data are available and where they may be obtained.

Ronald B. Robin Dire

Ronald B. Robie, Director Department of Water Resources The Resources Agency State of California

INTRODUCTION

This bulletin contains data regarding climate, surface water, ground water levels, and surface and ground water quality. The data were collected by the Department of Water Resources and by various organizations cooperating with the Department.

The Department's files contain some data that currently are not being published. Inquiries regarding local data should be directed to the District Offices listed as follows:

Central District
P. O. Box 160088
3251 S Street
Sacramento, CA 95816

Northern District P. O. Box 607 2440 Main Street Red Bluff, CA 96080 San Joaquin District P. O. Box 5710 3374 East Shields Avenue Fresno. CA 93755

Southern District P. O. Box 6598 849 South Broadway Los Angeles, CA 90055

Inquiries regarding statewide data should be directed to the Division Office:

Division of Planning P. O. Box 388 1416 Ninth Street Sacramento, CA 95802

Federal and local agencies also are maintaining substantial data files. A partial listing follows:

Appendix A

CLIMATOLOGICAL DATA

This appendix contains precipitation data for certain climate stations for the 1975 water year, October 1, 1974, through September 30, 1975. Additional precipitation data, as well as data concerning air temperature, wind, and evaporation, are available in the National Weather Service's publications "Climatological Data - California"; "Hourly Precipitation Data - California"; and, for particular key stations, "Local Climate Data". These publications can be obtained from:

Superintendent of Documents Government Printing Office Washington, D. C. 20402

Other agencies within the area covered by this report have established their own supplemental rain gage networks. Some of these agencies are: Alameda County Flood Control and Water Conservation District; City of San Francisco; Contra Costa County Flood Control and Water District; East Bay Municipal Utility District; Marin Municipal Water District; Marin County Department of Public Works; Monterey County; San Benito County; San Luis Obispo County Flood Control and Water District; Santa Clara Valley Water District; Santa Cruz County Department of Public Works; Sonoma County Water Agency; U. S. Department of the Army, Corps of Engineers, San Francisco District.

Each station in this appendix has been assigned an identification number. The letter and first digit denote the hydrographic unit as shown below. The remaining digits denote the alphabetical sequence of the station. A complete list of stations is contained in Bulletin No. 165, Index of Climatological Stations in California, 1971.

Central Coastal Area

- DO Santa Cruz Coast
- D1 Pajaro-San Benito Rivers
- D2 Lower Salinas River
- D3 Upper Salinas River
- D4 Monterey Coast
- T9 Upper Salinas River

San Francisco Bay Area

- EO San Francisco Bay
- El Coast-Marin
- E2 Marin-Sonoma
- E3 Napa-Solano
- E4 East Bay
- E5 Alameda Creek
- E6 Santa Clara Valley
- E7 Bayside-San Mateo
- E8 Coast-San Mateo

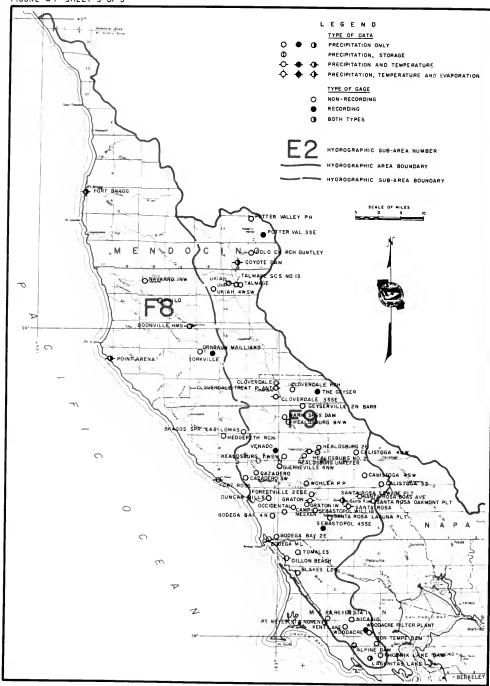

North Coastal Area

- F8 Mendocino Coast
- F9 Russian River

CLIMATOLOGICAL OBSERVATION STATIONS 1974 - 75

TABLE A-1

PRECIPITATION IN CENTRAL COASTAL AREA DURING WATER YEAR 1975

This table summarizes monthly precipitation totals for selected stations for the 1975 water year, October 1, 1974, through September 30, 1975. The table shows each station's assigned number in accordance with the explanation given in the introduction to this appendix. Location is shown by latitude and longitude in degrees to the third decimal.

Precipitation values are shown to the nearest hundredth (.01) of an inch. Where digital recording rain gages that record to only the nearest tenth (.1) of an inch are used, a zero is shown in the second decimal place. The following notations are used to qualify the values:

- .00- No record or incomplete record
 - B Record began
 - E Wholly or partially estimated
 - N Record ends
- .00T Trace, an amount too small to measure

The county code for each station is shown below:

Alameda	60	Marin	21	San Mateo	41

Appendix B

SURFACE WATER MEASUREMENTS

This appendix contains surface water data for the period from October 1, 1974, through September 30, 1975. These data consist of the amounts of water imported to the report area; daily gage heights; daily tides; and corrections and revisions to previously published reports of surface water data. Station locations are shown on Figure D-1, Sheet 2.

In addition to data collected and published by the Department of Water Resources in this appendix, the U. S. Geological Survey collects and publishes data on many additional gaging stations for the same report area. This work is done under a federal-state cooperative contract or through local cooperative arrangements with other local or governmental agencies. The data published in the following reports, together with this report, present a comprehensive analysis of water resources for the area:

- "Water Resources Data for California, Part 1: Surface Water Records, Volume I: Colorado River Basin, Southern Great Basin, and Pacific Slope Basins excluding Central Valley". U. S. Geological Survey.
- Bulletin No. 120, "Water Conditions in California, Fall Issue". Department of Water Resources.
- 3. Bulletin No. 157, "Index to Stream Gaging Stations in and Adjacent to California, 1970". Department of Water Resources. This index contains the period of record -- with the number of years missing -- and more information for stations in the report area. The index also identifies the agency from which a particular record may be obtained.

GROUND WATER MEASUREMENTS

This appendix contains summary and selected information concerning the level of ground water in wells within 36 ground water basins or areas in the Central Coastal Area. Wells are selected to reflect the ground water conditions of the area. These wells are continuously reviewed and, when conditions dictate, replacement wells are located and measured.

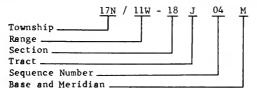

Earlier editions of this report contained a tabulation of individual measurements of ground water levels at wells. This type of data collected by the Department will be available at the various district offices of the Department. Please see the introduction at the front of this volume for the addresses of these district offices.

Table C-1 shows the average change in ground water levels for the various basins in the Central Coastal Area from spring 1974 to spring 1975. This table also shows the number of well measurements collected in the various areas. Figure C-2 contains graphical presentations of the average levels of ground water in the spring for the past several years. Figure C-3 is a graphical representation of the fluctuation of ground water level in certain selected wells for the past several years. An attempt has been made to select wells that represent conditions in the basin where the well is located. However, some caution in the use of these data is in order because ground water conditions can vary markedly with relatively small changes in horizontal location.

Two numbering systems are used by the Department to facilitate processing of water level measurement data. The two systems are the Region and Basin Designation and the State Well Numbering System. The regions used in Bulletin No. 130 are geographic areas defined in Section 13200 of the Water Code. This volume comprises the southern portion of North Coastal Region No. 1, the northern portion of Central Coastal Region No. 3, and all of San Francisco Bay Region No. 2. A decimal system of the form 0-00.00 has been selected according to geographic regions, ground water basins, and subbasins or subareas as follows:

The State Well Numbering System is based on township, range, and section subdivisions of the public land survey. The number of a well, assigned in accordance with this system, is referred to as the State Well Number, as illustrated below on the left.

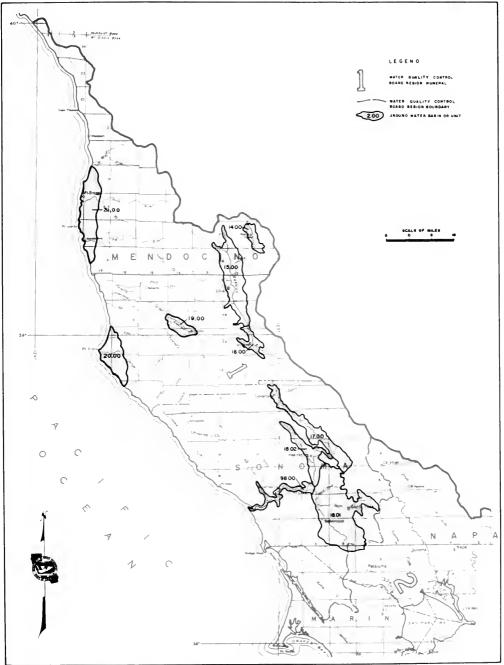

D	С	В	Α
Е	F	G	Н
М	L	K	J
N	P	Q	R

This number identifies and locates the well. In the example, the well is in Township 17 North, Range 11 West, Tract J of Section 18, located in the Mount Diablo Base and Meridian. A section is divided into 40-acre tracts as shown above on the right. Sequence numbers in a tract are generally assigned in chronological order. The example designates the fourth well to be assigned a number in Tract J.

Appendix D

SURFACE WATER QUALITY DATA

This appendix summarizes the surface water quality data collected in the Central Coastal Area during the period from October 1, 1974, through September 30, 1975. The data were collected from 164 stream, lake, and estuarine stations in cooperation with other state, local, and federal agencies.

The Department of Water Resources Laboratory used procedures from the latest edition of "Standard Methods for the Examination of Water and Wastewater" for the determination of all constituents.

Two numbering systems are used in this bulletin for identifying water quality stations. The first is for those stations for which the flow of water can be measured readily, as in streams and rivers. This system is described in Bulletin No. 157 "Index to Stream Gaging Stations In and Adjacent to California, 1970", Department of Water Resources.

The second numbering system is used for stations located in broad water bodies. This system is described as follows: The first two digits show the hydrographic unit as identified in the introduction to Appendix A. The third digit identifies the type of water body and, for this publication, is a "B" for Bay system; "E" for estuary; "L" for lake; "O" for Pacific Ocean; "R" for reservoir; and "S" for slough. The next digit is the last digit of the latitude in degrees, "3" for 33°, or "9" for 29°. The last three digits are the minutes of latitude to the tenth of a minute. The last four digits are the longitude in the same manner as latitude. A fifth digit indicates a sequence number when two stations have the same 8-digit latitude and longitude numbers.

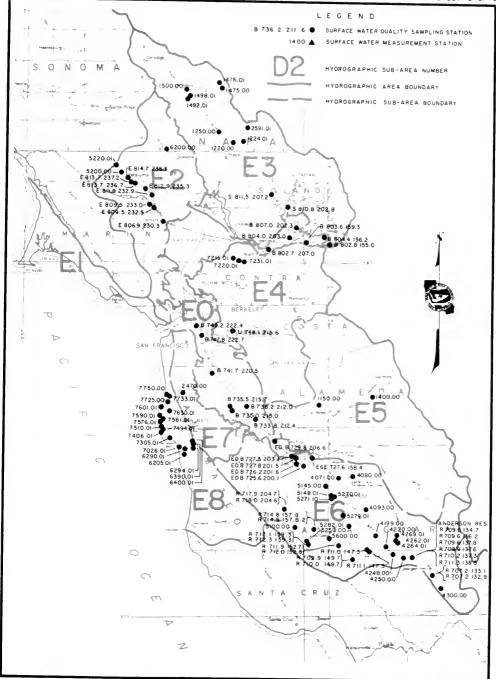

Example: EO B 802.3 207.1 2

EO	San Francisco Bay
В	Water Body Bay
8	38° Latitude
02.3	02.3' Latitude
2	122 ⁰ Longitude
07.1	07.1' Longitude
2	Second Station

Sampler and Lab Agency Codes

1 9 04	-	California	Department	of	Transportation,	District	4	Lab.
-------------------	---	------------	------------	----	-----------------	----------	---	------

2163 - California Department of Water Resources for SWRCB

2400 - Santa Clara Valley Water District

3207 - California Department of Transportation

5001 - U. S. Bureau of Reclamation

5050 - California Department of Water Resources

5052 - California Regional WQCB No. 2 San Francisco Bay

5060 - California Department of Health

5063 - Santa Cruz County

5818 - Cook Research Lab.

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

G.H. - Instantaneous gage height in feet above an established datum

Q - Instantaneous discharge in cubic feet per second

DEPTH - Depth in feet at which sample was collected

DO - Dissolved oxygen content in milligrams per liter
SAT - Percent of normal dissolved oxygen saturation

SAT - Percent of normal dissolved oxygen saturation

TEMP - Water temperature at time of sampling in degrees Fahrenheit (F)

and Celsius (C)

PH - Measure of acidity (<7) or alkalinity (>7) of water

EC - Electrical conductance in micromhos at 25°C

TDS - Gravimetric determination of total dissolved solids at 180°C

(Value followed by * is determination at 105°C)

SUM - Total dissolved solids by summation of analyzed constituents

TH - Total hardness

NCH - Noncarbonate hardness - any excess of total hardness over total

alkalinity

TURB - Jackson Turbidity Units measured with a Hellege Turbidmeter (E)

or a Hack Nephelometer (A) with (F) for field determination.

SAR - Sodium adsorption ratio

PERCENT REACTANCE VALUE is determined by dividing the sum of the cations or anions in milliequivalents per liter into each constituent in milliequivalents per liter, arriving at a percentage. For a partial analysis, an approximate value is determined by . multiplying the electrical conductance by 0.01 and using that as the cation or anion sum.

Mineral Constituents

TABLE D-3

MINOR ELEMENT ANALYSIS OF SURFACE WATER

Sampler and Lab Agency Codes

2400 -Santa Clara Valley Water District

3207 - California Department of Transportation

5001 - U. S. Bureau of Reclamation

5050 -California Department of Water Resources

5060 - California Department of Health

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

DEPTH - Depth in feet at which sample was collected

DISCH - Instantaneous discharge in cubic feet per second

- Electrical conductance in micromhos at 25° Celsius EC

TEMP - Water temperature at time of sampling in degrees

Fahrenheit (F) and Celsius (C)

PH - Measure of acidity (<7) or alkalinity (>7) of water

CHROM (ALL) - All chromium

CHROM (HEX) - Hexavelent chromium

D - Dissolved Т - Total

TABLE D-4

SUPPLEMENTAL MINOR ELEMENT ANALYSIS OF SURFACE WATER

Sampler and Lab Agency Codes

2400 - Santa Clara Valley Water District

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

DEPTH - Depth in feet at which sample was collected

DISCH - Instantaneous discharge in cubic feet per second EC - Electrical conductance in micromhos at 25° Celsius

TEMP - Water temperature at time of sampling in degrees

Fahrenheit (F) and Celsius (C)

PH - Measure of acidity (<7) or alkalinity (>7) of water

D - Dissolved T - Total

TABLE D-5

MISCELLANEOUS CONSTITUENTS IN SURFACE WATER

Sampler and Lab Agency Codes

1904 - California Department of Transportation, District 4 Lab.

2163 - California Department of Water Resources for SWRCB

2400 - Santa Clara Valley Water District

3207 - California Department of Transportation

5001 - U. S. Bureau of Reclamation

5050 - California Department of Water Resources

5063 - Santa Cruz County

5818 - Cook Research Lab

Abbreviations and Constituents

TIME - Pacific Standard Time on a 24-hour clock

TEMP - Water temperature at time of sampling in degrees Fahrenheit (F)

or Celsius (C)

- Electrical conductance in micromhos at 25° Celsius EC

- Dissolved oxygen content in milligrams per liter no

- Instantaneous gage height in feet above an established datum G.H.

- Measure of acidity (<7) or alkalinity (>7) of water: F - Field; L - Lab

- Instantaneous discharge in cubic feet per second DISCH

- Methylene blue active substance (a test for detergent surfac-MBAS

tants) in milligrams per liter: L - Linear alkylate sulfonate; A - Alkyl benzene sulfonate

DEPTH - Depth in feet at which sample was collected

- Jackson Turbidity Units TURB

- Tannin and lignin as tannic acid in milligrams per liter T+L

- Field determination of residual chlorine in milligrams per liter CHLOR

- Oil and grease in milligrams per liter 0+G

COLOR - True color in color units

- Settleable solids in milliliters per liter (ML/L) and milligrams SET S

per liter (MG/L): F - Field; L - Lab

- Biochemical oxygen demand in milligrams per liter: A - 4 days; BOD B - 5 days; C - 6 days; D - 7 days; E - 100 days; F - other

- Suspended solids in milligrams per liter: 5 - at 105°C; SUS S

8 - at 180°C

- Chemical oxygen demand in milligrams per liter

V SUS S - Volatile suspended solids in milligrams per liter

CYANIDE - Cyanide in milligrams per liter PHENOLS - Phenols in milligrams per liter

- Total organic carbon in milligrams per liter TOC

- Dissolved organic carbon in milligrams per liter DOC

- Iodide in milligrams per liter IODIDE - Threshold odor number at 60°C T ODOR

BROMIDE - Bromide in milligrams per liter

SULFITE - Sulfite in milligrams per liter

- Total sulfides in milligrams per liter T SULF

D SULF - Dissolved sulfides in milligrams per liter

CC EXT - Carbon chloroform extract

CA EXT - Carbon alcohol extract

5050 - California Department of Water Resources

5060 - California Department of Health

5063 - Santa Cruz County

Abbreviations and Constituents

TIME	-	Pacific Standard Time on a 24-hour clock
G.H. DISCH	<u>-</u>	Instantaneous gage height in feet above an established datum Instantaneous discharge in cubic feet per second
TEMP	-	Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)
DEPTH	-	Depth in feet at which sample was collected
PH	-	Measure of acidity (<7) or alkalinity (>7) of water
EC	-	Electrical conductance in micromhos at 25°C
TURB	-	Jackson Turbidity Units measured with a Hellege Turbidmeter (E) or a Hack Nephelometer (A) with (F) for field determination.
F-C02	-	Field determination of carbon dioxide in milligrams per liter
CACO3 P CACO3 T	<u>-</u>	Field Alkalinity (Phenol) Field Alkalinity (Total)
D NO2 + NO3 T NH3	- -	Dissolved nitrate and nitrite as N Total ammonia as N
D NO2 D NO3		Dissolved nitrite as N Dissolved nitrate as N
D ORG N T ORG N	-	Dissolved organic nitrogen as N Total organic nitrogen as N
D (NH3 + T ORN N)	-	Ammonia and dissolved organic nitrogen as N $\mbox{\sc Ammonia}$ and total organic nitrogen as N
DIS A.H.PO4	-	Dissolved acid hydrolyzable phosphate as P
D O-P04 T O-P04	-	
D TOT P T TOT P	- -	The state of the property of the state of th

TABLE D-7

PESTICIDES IN SURFACE WATER

Sampler and Lab Agency Codes

5001 - U. S. Bureau of Reclamation

5050 - California Department of Water Resources

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

TEMP - Water temperature at time of sampling in degrees

Fahrenheit (F) and Celsius (C)

EC - Electrical conductance in micromhos at 25°C

DO - Dissolved oxygen content in milligrams per liter
PH - Measure of acidity (<7) or alkalinity (>7) of water

DEPTH - Depth in feet at which sample was collected

DISCHARGE - Instantaneous discharge in cubic feet per second

Pesticides

Chlorinated Hydrocarbons

Code Most Common Name

ATRAZSIMAZ - Atrazine and/or Simazine

CHYDROCARB - Chlorinated hydrocarbon compounds as DDT

UNKNOWNS - Complex chlorinated compound mixture as (Reported as DDT),

one or more

NONE

DETECTED - No detectable amount of Chlorinated Hydrocarbons

Organic Phosphorus

DIAZINON - Diazinon PARATHION - Parathion

UNKNOWNS - Complex mixture as Parathion (Reported as Parathion),

one or more

NONE

DETECTED - No detectable amount of organic phosphorus

PHYTOPLANKTON ANALYSIS OF SURFACE WATER

Codes and Abbreviations

<u>Total</u>	-	Total phytoplankton per milliliter
P1 C-	_	Plus-Cross Alass

Bl-Gr - Blue-Green Algae

<u>Green</u> - Green Algae

<u>Flag</u> - Flagellates

<u>C/P</u> - Centric over Pennate

Samp - 5050 - California Department of Water Resources

<u>Lab</u> - 5050 - California Department of Water Resources Laboratory

Most Abundant Phytoplankton

	Blue-Green Algae		Green Algae
B 52	Aphanizomenon	G 02	Ankistrodesmus
		G 03	Arachnochloris
	Flagellates	G 04	Centritractus
		G 05	Closterium
F 02	Chlamydomonas	G 07	Crucigenia
F 03	Euglena	G 15	Scenedesmus
F 08	Trachelomonas	G 31	Geminella
F 56	Crytomonas	G 38	Spirogyra
F 59	Glenodinium	G 40	Chlorella
F 70	Peridinium	G 45	Volvox
F 99	Unidentified

TABLE D-10

BIOLOGICAL ANALYSIS OF SURFACE WATER

Sampler and Lab Agency Codes

- 2163 California Department of Water Resources for State Water Resources Control Board
- 5050 California Department of Water Resources
- 5052 California Regional Water Quality Control Board No. 2, San Francisco Bay
- 5060 California Department of Health

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

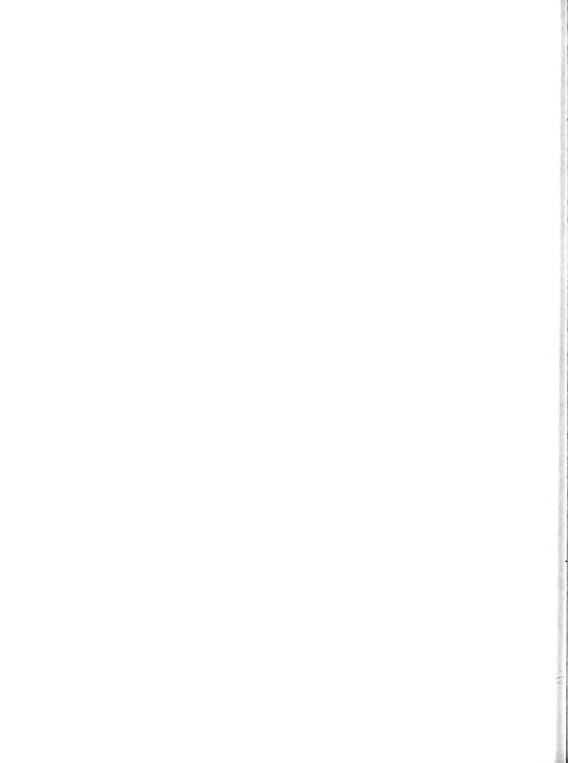

DEPTH - Depth in metres at which sample was collected

SAMP - Sampling Agency

LAB - Laboratory performing analysis

APPENDIX E

GROUND WATER QUALITY DATA

This appendix presents ground water quality data collected during the period from October 1, 1974, through September 30, 1975. The data were collected from a number of major ground water sources in the Central Coastal Area in cooperation with other state, local, and federal agencies. During the 1975 water year, 423 wells were sampled in 35 ground water basins and subbasins or subareas.

At the time of field sampling, pH and temperature measurements are normally made. Comments on current conditions are noted in field books which are available in the files of the Department of Water Resources.

Laboratory analyses of ground waters were performed in accordance with "Standard Methods for the Examination of Water and Wastewater", 14th Edition.

The Region and Basin and State Well Numbering Systems are described in Appendix C, "Ground Water Measurements", on page 19. The locations of the ground water basins and subbasins are shown on Figure C-1, pages 21, 22, and 23.

INDEX TO GROUND WATER QUALITY DATA IN THE CENTRAL COASTAL AREA

TABLE E-1

MINERAL ANALYSES OF GROUND WATER

Sampler and Lab Agency Codes

2400 - Santa Clara Valley Water District

5000 - U. S. Geological Survey

5050 - California Department of Water Resources

5064 - California Department of Water Resources, Castaic Lab

5100 - Alameda County Flood Control and Water Conservation District

5401 - Alameda County Water District

5701 - California Water Service Company

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

TEMP - Water temperature in degrees Fahrenheit (F) and Celsius (C) at the time of field sampling

PH - Measure of acidity (<7) or alkalinity (>7) of water

EC - Electrical conductance in micromhos at 25° Celsius

TDS - Gravimetric determination of total dissolved solids at 180°C

SUM - Total dissolved solids by summation of analyzed constituents

TH - Total hardness

NCH - Noncarbonate hardness - any excess of total hardness over - total alkalinity

SAR - Sodium adsorption ratio

Mineral Constituents

TABLE E-2

MINOR ELEMENT ANALYSIS OF GROUND WATER

Sampler and Lab Agency Codes

5050 - California Department of Water Resources

5701 - California Water Service Company

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

EC - Electrical conductance in micromhos at 25° Celsius

TEMP - Water temperature at time of sampling in degrees

Fahrenheit (F) and Celsius (C)

PH - Measure of acidity (<7) or alkalinity (>7) of water

CHROM (ALL) - All chromium

CHROM (HEX) - Hexavelent chromium

D - Dissolved

T - Total

TABLE E-3 SUPPLEMENTAL MINOR ELEMENT ANALYSIS OF GROUND WATER

Sampler and Lab Agency Codes

5050 - California Department of Water Resources

5701 - California Water Service Company

Abbreviations

TIME - Pacific Standard Time on a 24-hour clock

EC - Electrical conductance in micromhos at 25° Celsius

TEMP - Water temperature at time of sampling in degrees Fahrenheit (F) and Celsius (C)

PH - Measure of acidity (<7) or alkalinity (>7) of water

D - Dissolved

T - Total

Appendix F

WASTE WATER DATA

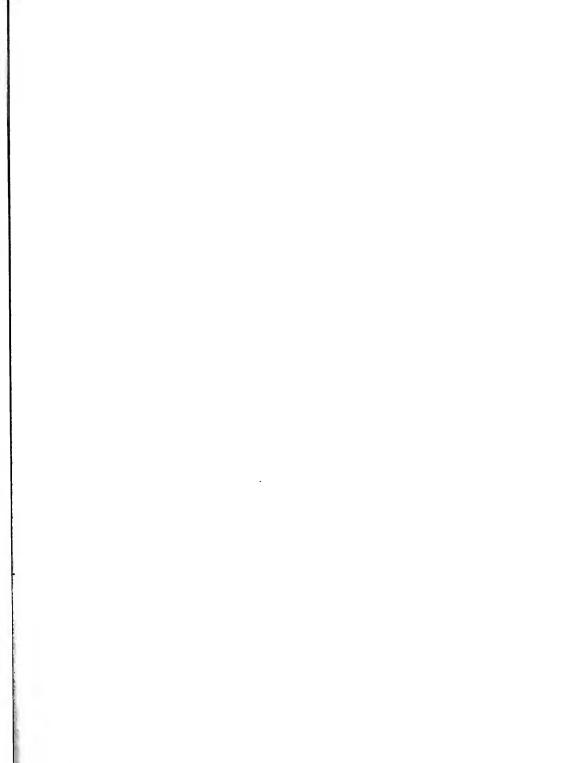

Appendix F, "Waste Water Data", which appeared in certain volumes of Bulletin No. 130 series, has been discontinued. For information regarding waste water, the reader is referred to the recently reactivated Bulletin No. 68 series: "Inventory of Waste Water Production and Waste Water Reclamation Practices in California".

Please note the data presented in Bulletin No. 68 are on a <u>calendar year</u> basis rather than a <u>water year</u> basis as is the case in Bulletin No. 130.

THIS BOOK IS DUE ON THE LAST DATE STAMPED BELOW

JUN 1 5 1382

BOOKS REQUESTED BY ANOTHER BORROWER ARE SUBJECT TO RECALL AFTER ONE WEEK. RENEWED BOOKS ARE SUBJECT TO IMMEDIATE RECALL
